

Department of Political Science

Programme Outcomes

- PO.1. The Course Curriculum inculcates among students a basic understanding of the rights and duties of citizenship and thereby to act as responsible citizens.
- PO.2. Understanding the inter relationship between Policy decisions and its effect on society. This is achieved through a comprehensive teaching of the practice of Public administration in India.
- PO.3. Understanding of government institutions, electoral processes and Policies in a variety of countries around the world and the ability to compare the effectiveness or impact of various Political arrangements across countries.

Programme Specific Outcome

As we all know today, Political Science is a Social Science discipline that not only studies government and state but, at the same time, applies empirical theory and scientific methods to the analysis of Political matters. As the world today revolves around Political as well as economic considerations, a formal degree of Political Science has the almost practical applicability. Its subject matter is concerned with the everyday life of an individual living in a society and state. Political science is the study of Political behavior, governance and power and how these are shaped by institutional setting and by the ideas, interests and resources of Political Actors. Therefore a degree in Political Science not only enables students to enhance their grasp of the Basic Structures and Processes of governmental system, public Policies and Political forces that directly impact their lives, but also help them analyze Political Problems, arguments, information and theories and to apply methods appropriate for accumulating and interpreting data applicable to this discipline. Above all it aids students in becoming informed citizens by amplifying knowledge on their entitlement to the rights and duties within a state.
