

D.L.S. P.G. College, Bilaspur (C.G.)

Institutional Distinctiveness (2018-19)

To be a distinctive and innovative institution of national significance, an institution with a pivotal role in the educational, economic, social, cultural, and environmental infrastructure of its region and which reaches out to the people of the marginalized sections and the rest of the nation through its research and teaching. The stated missions are dynamic ones and encourage new inclusions from time to time depending upon students' preferences and local needs. Care is taken to ensure the holistic development of the students.

The vision, mission, and goals of the institution are in tune with the objectives of higher education. The governance of the institution is reflective of effective leadership. The college aims at an integrated and personalized education of the youth to produce intellectually competent, morally upright, socially committed, spiritually inspired, and nationally dedicated men and women in the service of India, today and tomorrow. The college is committed to preparing its young cadets in such a way so that they can fight for education, own rights, and empower the lesser privileged social groups such as the tribal, backward classes, minorities, women, and other vulnerable sections of the society.

To ensure the promotion of Chhattisgarhi Culture, language, tradition and heritage among the students and various stakeholders. The college has established Hamar Chhattisgarh (Our Chhattisgarh) corner in the Central Library. It's a collection of books in Chhattisgarhi language. Similarly, the medicinal herbal garden is established in the college, with the main objective of popularizing the utility of important medicinal plants among the various stakeholders and sensitizing the public about our traditional ethnobotanical knowledge. It also helps in conserving Rare; Endangered and Threatened species present in our state. The two best practices are: 1. Hamar Chhattisgarh (Our Chhattisgarh) corner in Library and 2. Establishment of Medicinal Plant Garden. These were two distinct practices for this year.
